HIMALAYAN WILDLIFE EXPEDITION

# Snow Leopards on the Roof of the World

Fifteen days in Ladakh with Martin Gregus, tracking snow leopards, Pallas's cats and high-altitude wildlife with expert spotters, remote camp access and field-based photography masterclasses.

---

DURATION

15 Days / 14 Nights

DATES

25 March - 09 April 2027

GROUP SIZE

Limited to 8 Guests

PRICE

US\$15,750

## HIGHLIGHTS

# Rare cats, remote access and patient fieldcraft

### WILDLIFE

#### Prime snow leopard terrain

Base out of Lungmar Remote Camp with direct access to Hemis National Park and live updates from expert trackers in the valleys.

### RARITY

#### Pallas's cat country

Travel onto the Changthang region of the Tibetan Plateau in search of Pallas's cats, Tibetan wolves, sand foxes and gazelles.

### GUIDE

#### Martin Gregus in the field

Learn from an award-winning wildlife photographer with nearly two decades of snow leopard expedition experience.

### ACCESS

#### Expert trackers and 4×4 support

Each day is shaped by spotters scanning ridgelines before first light, with vehicles ready to move when the radio call comes in.

### CULTURE

#### Monasteries and Ladakhi homes

Explore Tibetan Buddhist monasteries, mountain villages and the lived reality of communities sharing space with wild cats.

### IMPACT

#### Positive Impact Contribution

US\$350 per person is included, supporting a stronger connection between the expedition and the landscape it depends on.

## THE EXPERIENCE

# One of the rarest cats on earth, on its own terms

Snow leopards are among the hardest animals on earth to find, let alone photograph. This journey is built around doing the search properly.

The expedition begins in New Delhi before flying into Leh, where the group takes time to acclimatise and explore the cultural edge of the Himalayas. From there, you move into snow leopard country with expert trackers, 4×4 support and Martin Gregus working alongside the group in the field.

Some days may deliver a direct encounter. Other days may bring tracks, calls from distant valleys, a kill site, or the ghost of movement across a ridgeline. That is the point. This is real wildlife work in high mountain terrain, with patience and preparation at the centre of the experience.

The expedition also moves east into Changthang, part of the Tibetan Plateau, where Pallas's cats, Tibetan wolves, Tibetan sand foxes and Tibetan gazelles shape a different kind of photographic challenge.

Snow leopards disappear into this terrain. Finding them takes local knowledge, time and a disciplined eye.

*"I have had the almost unparalleled privilege to experience iconic wildlife in a way few people have ever had."*

**Martin Gregus**, Storyteller Guide

## YOUR GUIDE

# Martin Gregus

## STORYTELLER GUIDE

Martin Gregus grew up in a family of artists, learned photography from his father and began exploring wildlife with a camera before most kids had settled on a direction.

Nineteen years later, his work has taken him across all seven continents and into some of the most remote ecosystems on the planet. He has earned two wins and two nominations at Wildlife Photographer of the Year, and his polar bear project, 33 Days Among the Bears, became an international story after National Geographic coverage.

His cinematography has contributed to productions for Disney, BBC and Netflix. On this expedition, Martin brings the patience, technical control and field awareness required to make meaningful images in one of the world's most demanding wildlife environments.

#### WHY BOOK THIS EXPERIENCE

## This is not a distant sighting trip

The difference is structure: a small group, the right camp position, local trackers already scanning the ground, and Martin working with you before, during and after the field days.

Snow leopard photography asks for discipline. You need to read rock, snow, tracks, weather and silence. The expedition is designed around that reality. Each day begins with spotters moving early into the valleys, the camp waiting on live updates, and the group ready to respond when conditions change.

Martin's masterclasses are woven into the rhythm of the expedition. You will work on field technique, long-lens discipline, image review, editing decisions and the patience required to create work that carries more than proof of sighting.

Then the journey shifts to the Tibetan Plateau, where the target species change and the landscape opens out. Pallas's cats and plateau wildlife add depth to the trip, turning it from a single-species search into a broader Himalayan field story.

## ITINERARY

# 15 days across Ladakh and the Tibetan Plateau

DAY

1

## Where India Begins

### Arrive in New Delhi

Land in New Delhi, meet the Airguides team at the airport and transfer to The Roseate House. Tonight is for settling in, getting your bearings and letting the anticipation build.

DAYS

2-3

## Tibetan Monasteries of Leh

### Acclimatisation and cultural depth

Fly with the group to Leh, gateway to the Himalayas. The first day is kept deliberately slow so your body can adjust to altitude. The following day opens the story of Ladakh through monasteries, lanes, mountain views and local context.

DAYS

4-10

## Lungmar Remote Camp, Hemis National Park

### Snow leopard tracking days

Expert spotters leave before first light, scanning ridgelines and slopes from strategic points across the valleys. You wake to hot coffee, tea and breakfast, then the radio call shapes the day. Field time combines driving, walking, packed meals, village visits, image review and photography masterclasses with Martin.

DAYS

11-13

## The Tibetan Plateau

### Pallas's cats and Changthang wildlife

The expedition shifts east into the Changthang region, one of the most remote corners of Ladakh. Search for Pallas's cats, Tibetan wolves, Tibetan sand foxes and Tibetan gazelles from a simple local guesthouse base in Hanle.

DAY

14

## Return to Leh

### Grand Dragon Hotel

Drive back through the mountains to Leh. This is a decompression day: download images, rest properly and sleep somewhere soft after the remote section of the expedition.

DAY

15

## Goodbye India

### Fly to New Delhi

Fly back to New Delhi and transfer to The Roseate House in Aerocity. International departures can be arranged for later tonight or the following morning.

## ACCOMMODATION

# Remote where it matters, comfortable where it counts

The trip balances serious field access with carefully planned recovery nights before and after the remote sections.

Your journey includes one pre-trip night and one post-trip night at The Roseate House in New Delhi, two nights at the Grand Dragon Hotel in Leh, seven nights at Lungmar Remote Camp and three nights in a local guesthouse in Hanle.

Lungmar Remote Camp is the centre of the snow leopard search, positioned for access to prime terrain and tracker updates. Hanle is simpler and more adventurous, because that is what the Tibetan Plateau section requires.

Shared rooms are included. Private rooms may be available with a single supplement, subject to final confirmation and local availability.

## IN THE FIELD

# The radio call changes everything

The rhythm is simple: trackers move first, the group stays ready, and the day follows the best information available.

Snow leopards do not operate on a tour schedule. Each morning, spotters position themselves across valleys and scan for movement, tracks and behaviour. When a credible update comes through, the group moves by 4×4 and on foot as conditions allow.

Some days will be about distance and patience. Some will be about being ready quickly. Quieter periods become part of the learning, with Martin working through long-lens choices, exposure in snow and rock, composition, behaviour and editing decisions.

This is fieldcraft as much as photography: knowing when to wait, when to move and how to stay calm when one of the world's rarest cats finally appears.

*"To be in the presence of a unique visionary like Martin Gregus and be welcomed into his home away from home in the middle of nowhere is truly a once in a lifetime event."*

**Anne Prather**, United States

"Airguides were exceptional hosts. Seamless, professional and incredibly well organised from start to finish."

**Adam McKnight**, Raja 2025

## YOUR CREW

# A small team built around remote wildlife work

**Martin Gregus**

**STORYTELLER GUIDE**

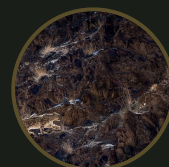

Award-winning wildlife photographer, filmmaker and expedition guide bringing deep snow leopard experience and hands-on masterclasses.

**Paul Rowsthorn**

**EXPEDITION DIRECTOR**

Founder of Airguides and expert expedition leader with over 10 years experience.

**Local Trackers**

**FIELD TEAM**

Expert spotters, driver guides and local support teams who understand the ridgelines, routes and realities of high-altitude tracking.

## INCLUSIONS

# What is covered

## Included

- One pre-trip night at The Roseate House, New Delhi
- One post-trip night at The Roseate House, New Delhi
- Two nights at the Grand Dragon Hotel in Leh
- Seven nights at Lungmar Remote Camp
- Three nights at a local guesthouse in Hanle
- Private transfers with driver guides
- All-inclusive meals during the expedition
- All guiding, tracking and expedition services
- Storyteller guiding and masterclasses with Martin Gregus
- Wildlife photography and editing masterclasses
- Airguides Expedition Leader throughout
- Personal gallery of trip highlights by Martin Gregus
- Positive Impact Contribution of US\$350 per person

## Not Included

- International flights
- Flights not listed under included services
- Travel insurance
- Visa costs, passport fees and medical expenses
- Tips and gratuities
- Personal expenses, laundry and premium beverages
- Single supplement, if a private room is requested or required
- Any services not listed as included in final booking terms

## FAQ

# What guests usually need to know

## Are snow leopard sightings guaranteed?

No. These are wild animals in a vast mountain landscape. The itinerary, camp position and tracker network are designed to give the group the strongest possible chance of a real encounter, but sightings cannot be guaranteed.

---

## How physical is the expedition?

Guests should be comfortable with high altitude, cold conditions, uneven ground and long field days. Some tracking involves walking, but movement is shaped by safety, conditions and the group's ability.

---

## Do I need to be an advanced photographer?

No. The trip is built for wildlife lovers and photographers who want to improve. Martin's masterclasses cover field technique, image review and editing, with guidance adapted to the group.

---

## What camera gear should I bring?

A camera body with a reliable telephoto lens is recommended. A detailed gear list will be shared before departure, including cold-weather battery, storage and layering advice.

---

## What makes the Hanle section different?

Hanle and the Changthang region are more remote and simple than Leh or camp. The accommodation is local guesthouse style, chosen because it puts the group in the right landscape for Pallas's cats and plateau wildlife.
